Its my understanding that Cindy is ok with the Wednesday sampling in this case...its a high priority well being given EPA water.

We are trying to work it in on Tuesday, btw. but would be one home on Wed. am at the latest.

OK?

Subject: Sampling on Wednesday

Guys, the clip below from today's update reminded me of something.....

One of the four homes receiving water from EPA will be sampled on Wednesday 2/15/12. This home was not sampled before due to previous damage to the well. A plumber made necessary repairs to allow sampling.

Cindy C was concerned this morning about us doing any sampling and them getting samples after Tuesday. While she didn't mention the basis for her concern on the call, John Krakowiak had told me last week that apparently , the lab is up against some OSHA requirements regarding consecutive days that lab personnel can work. Anyway, I promised Cindy that if we did arrange for the sampling on Wednesday that we would call her directly to discuss what could be done to work thru or around the lab's issue. So can one of you guys (Mr. Rupert?) call Cindy this afternoon? Thanks, den.
